Bechlores of Computer Application
Kumaun University   📅 07/2015 - 07/2018

VOLUNTEERING

Web and Mobile Application Developer
Prospective Analytics   📅 01/2020 - 09/2021
My experience as a React Native developer makes me a strong candidate for this job because I have a proven ability to build cross-platform applications with a focus on performance and user experience.

React Native Developer
AAA2 Innovate   📅 10/2021 - 05/2022
As a react native developer, I excel in problem-solving, collaboration, and communication with cross-functional teams. My expertise includes state management, backend integration, performance monitoring, and CI/CD pipelines. Additionally, I am adaptable, continuously learning, and engaged with the developer community. My commitment to code quality, scalability, and Agile practices ensures efficient and high-quality project delivery.

React Native Developer
Nubiz Solutions Private Limited   📅 05/2022 - Present
Throughout my career, I've had several experiences that have made me a stronger candidate for a React Native developer position. I have a solid foundation in JavaScript and TypeScript, which has been crucial for developing robust React Native applications. For instance, in my previous role, I worked on a cross-platform mobile app where I was responsible for implementing complex navigation patterns using React Navigation and optimizing performance through techniques like memoization and lazy loading.
I've successfully deployed apps to both the App Store and Google Play Store. One project I'm particularly proud of involved integrating several third-party APIs to enhance app functionality, which required thorough testing and debugging.
